

PRATEEK HOORI LAL | *Ex-Cisco/EX-HCL/Ex-Manh*

SENIOR SOFTWARE ENGINEER /JAVA DEVELOPER

E-mail: prateekhlal@outlook.com

Mobile: +91- 9148791331

CORE COMPETENCIES

- Software Development
- SDLC/STLC
- Agile/Scrum Methodologies
- Continuous Improvement Methods
- Cross-Functional Coordination

TECHNICAL SKILLS

- Programing Language: Core Java, J2EE
- Frameworks: Spring boot, Hibernate, Kafka, Docker, AWS,EC2, Lambda.
- Servers: WebSphere, JBoss
- DBMS: Oracle, DB2, Postgres
- IDE: Eclipse, IntelliJ
- Repository: Git/Bitbucket
- CI/CD: Jenkins
- Project Management Tool: Maven

ACCOLADES

- Awarded for proficiently integrating Swagger API in 4 Microservices
- Acknowledged for swift resolution of critical bugs
- Implemented a rate limiter feature Reduced high event influx by 45%.
- Collaborated with the Israel Team to deploy the XStream security Framework

ACADEMIC DETAILS

- Post-Graduation Diploma in Advance Computing (PGDAC) from CDAC Pune in 2015
- B.Tech. from Sam Higgin Bottom University of Agriculture in 2014

PROFILE SUMMARY

- Energy-driven Professional offering over **9.5 years** of rich and qualitative experience in **Software Development, Java, and Spring Boot.**
- Demonstrated expertise in **Algorithms, Data Structures, OOP, and Design Patterns**, coupled with code fixes and enhancements for future code releases and patches
- Proficiency in managing and leading the end-to-end software development life cycle (SDLC) for multiple projects simultaneously from requirement gathering, planning, designing, unit testing, implementation, and configuration to documentation
- Possess communication skills, actively engaging with team members, contributing to meetings, and fostering collaborative efforts to achieve project objective

WORK EXPERIENCE

❖ Hcl-Software,Bangalore as Software Engineer III: *August'2024-December'2025*

- **Project: HCL's DevOps Test UI (DTUI)** is an automated software testing solution designed to improve the efficiency and accuracy of application. It supports continuous testing and integrates seamlessly with DevOps processes, enabling comprehensive test automation for UI, API, performance, and functional testing. The platform accelerates development cycles and ensures high-quality releases by automating repetitive tasks and providing robust reporting and analytics capabilities.
 - Design, develop, and maintain core Java-based features for the DevOps Test UI product, ensuring scalability, performance, and reliability.
 - Collaborate with product owners and stakeholders to analyze and refine user stories for feature development.
 - Conduct spikes to explore and evaluate technical solutions for complex requirements, ensuring feasibility and alignment with the product roadmap.
 - Build and maintain scalable APIs and services to facilitate seamless integration with CI/CD workflows.
 - Write and maintain high-quality, testable code aligned with user story acceptance criteria.
 - Mentor junior developers, review code, and enforce best practices in software development.

❖ Cisco Systems, Bangalore as Software Engineer I: *September'2017-April'2024*

- **Project 1: EPNM (Evolved Programmable Network (EPNM/CNC) - Inventory Team**
- **Project 2: EPNM (Evolved Programmable Network (EPNM/CNC) - Fault Team**
 - Architecting software solutions, providing technical guidance, and ensuring adherence to best practices and coding standards using Java technologies, coding, implementing, integrating them, and debugging new & existing software programs
 - Utilized ****AWS**** for 2 years within the Fault Team to introduce resilient and fault-tolerant cloud solutions
 - Following Agile Methodology for development, debugging algorithm simulations to identify failures, defining test equipment, and measuring products' performance
 - Conducting unit testing and managed version control and code management

- Developing new requirements for various clients across all modules of the EOM and SIF products and resolving issues related to the EOM and SIF products
- Coordinating with consultants to prepare functional design documents and preparing technical design documents and estimating timeframes for new modules

❖ **Manhattan Associates Inc, Bangalore as a Software Developer: Aug'2015-**

Sep'2017

➤ **Project: Enterprise Order Management (EOM)**

- Successfully coordinated with consultants to prepare functional design documents and provided technical design documents with estimated timeframes for new modules, resulting in improved client satisfaction.
- Successfully increased code coverage from minimal levels to 90% by implementing comprehensive unit test cases and maintaining and delivering new applications.
- **Client(s):** Michale Kors, BBAB (Bed Bath and beyond)
- **Description:** This software gives multi-channel retailers and consumer goods manufacturers with retail/direct operations the tools to manage, monitor & optimize cross-channel order management from the time of order entry through funding sourcing, allocation, shipping, and settlement

➤ **Project: Store Inventory & Fulfillment (SIF)**

- **Client(s):** Michael Kors, BBAB (Bed Bath and Beyond)
- **Description:** It provides powerful fulfillment and inventory management capabilities that are purpose-built for retail store environments. It comes equipped with an easy-to-use, mobile solution allowing store associates to quickly manage order-fulfillment requests, providing real-time order acknowledgment and status updates back to your customers
